The ideal alternative to other booms often manufactured overseas & shipped to the UK. Absorbent booms are essential in protecting our environment.

Land booms help reduce ground contamination & reduce the risk of harming the environment.

Marine booms can be deployed on ponds, streams, marinas, harbours and rivers to contain and absorb oil spills. Oil pollution can be devastating to the water environment, causing harm to animals, insects and plant life; just 1 litre of oil has the capacity to contaminate 1 million litres of water.

Full range of Land, Drain and Marine booms available in our main Catalogue. All Manufactured in Britain.
